

Provider Mode Guide

Easily Send Patients their Prescription Information with Blink Health's Provider Mode

1. DOWNLOAD APP

To use Provider Mode, first download the Blink Health app and create a free account

2. ACTIVATE PROVIDER MODE

Once you're signed in, go to the Menu and Settings, then toggle the "Provider Mode" switch on.

Please Note: While in Provider Mode you will not be able to purchase medications yourself. If you'd like to buy a medication on Blink Health, you'll have to turn off Provider Mode in order to add a medication to your cart and checkout.

3. SEND A MEDICATION

Now you can look up any medication, select the form/ dosage/quantity, and see the Blink Price. When you find a medication that you plan to prescribe, you can click the "Send to Patient" button to text them a link to the medication name, form, dosage, quantity, and Blink Price.

Please Note: Your phone number will NOT be shown to the patient when you text them from Provider Mode. The text message comes from our Blink Health number (84825), NOT yours.

4. PATIENT SAVES

When your patient clicks the link that you sent them, they will be prompted to create an account of their own. When they log in, their cart will be pre-populated with the medication that you selected for them. By sending your patient a Blink Price through Provider Mode, the patient will also receive up to \$30 off the first purchase.
